

**Overview**

This crosswalk lists the most used financial reports in University Business Intelligence (UBI) Reporting and maps them to the reports that are most like them in Workday. Note that the Workday reports contain real time data.

The table also includes new UBI Analytics (Qlik Sense®) reports that are available for viewing Workday financial data. The data in the Qlik Sense reports is based on the daily refresh date/time.

 <p><b>NOTE</b></p>	<p>For information about navigating reports and general report functionality in Workday, refer to the <a href="#">Reporting Functionality in Workday Quick Reference Guide (QRG)</a> and/or take the <a href="#">Workday Reporting self-paced course</a>. There are also other general resources, including video demonstrations, on the <a href="#">UVAFinance Training website</a> under the <b>Workday Reporting</b> functional area. The website also includes a link to the <a href="#">Reporting FAQ</a>.</p>
